

Thermal Actuator

Thermocouple for controlling zone heating and cooling valves.

Features

- Control direction: normally closed
- Power consumption: 3W
- Working temperature: -5°C-60°C
- Strength: 100±10N
- Stroke: ≥4 mm
- Degree of protection: IP54
- Standard: EN 60730
- Adapter: M30x1.5mm (possibility of purchasing separately sold adapter)
- Closing and opening time: 3-5 minutes
